

Scientific Writer

Job Description

The Biochemical Research Laboratory at Rowan University is recruiting a highly motivated full-time or part-time Scientific Writer to prepare complex report documents from raw and or processed data; compose grant applications, patent applications, and manuscripts, addressing the drug discovery, cancer research, molecular biology and relevant areas; review reports for correct scientific interpretation and provides technical assistance to Shared Services staff in preparing reports in compliance with FDA regulations.

Position Requirements

Bachelor's degree (B.A.) from four-year college or university with two to five years related experience and demonstrated ability to comprehend scientific study organization. This highly professional individual must be able to gather information, process the information into basic instructions that is presented in a consistent manner. Proficiency in the use of Microsoft Office products including familiarity with electronic document management systems and website updating is a plus. Strong attention to detail and communication skills are required.
