

As you're most likely aware, elvis has been tied to the University wide Directory Server since last summer for password validation. As a result we no longer require individual "account request forms" to grant students access to elvis.

Individual students that register for a course during drop/add can individually request accounts by contacting support@elvis.rowan.edu and providing their Rowan Network username and identifying the class they need the account for.

We would like to request that students *do not* go over to Memorial.

They'll be able to get faster turn-around on email, and since the number of staff that can assist them in Memorial is somewhat limited there's no guarantee that someone will be immediately available to assist them if they do come over.
