## Department of Computer Science

### Information on Evening Classes for CS Majors & Minors

The Computer Science Department is committed to making our degree accessible to those students who are only able to take classes in the evenings (after 4:45 p.m.) Occasionally some of the following classes may begin as early as 4:45 p.m., but we generally try to schedule our evening classes for 5:00 p.m. and later.

### Required Courses Offered in the Evening

<u>Fall of Even Years</u>	<u>Spring of Odd Years</u>
Computers & Society	Digital Computer Lab
Data Structures	Object Oriented Prog. & Data Abstraction
Foundations of Computer Science	Principles of Digital Computers
Intro. to Object Oriented Programming	Senior Project
Programming Languages	

<u>Fall of Odd Years</u>	<u>Spring of Even Years</u>
Computers & Society	Computer Organization
Data Structures	Design & Analysis of Algorithms
Foundations of Computer Science	Object Oriented Prog. & Data Abstraction
Intro. to Object Oriented Programming	Operating Systems
Principles of Software Engineering	Senior Project

### Advanced Electives Offered in the Evening

At least one advanced elective is offered in the evening each semester.

#### NOTES:

While we do our best to follow this schedule (and generally succeed), all courses are offered subject to sufficient enrollments and instructor availability. Please note that we try to offer several of the above courses in evening slots more frequently than listed above.

Please refer to the course schedule each semester for a complete listing of evening courses. Note that classes beginning at 4:45 or 5:00 may appear in the schedule as “day” classes.
