Athletic Training Specialization Minor Curriculum Change

Proposal for Advanced Emergency Care (0835.334) Course Description Change

1. Details:

- a. The previous course description for Advanced Emergency Care (0835.334) was written as follows:
 - i. *“This course is designed as a public/community service course. Public school nurses, emergency and volunteer personnel, athletic trainers, and others are trained to become American Red Cross certified instructors in CPR for the Professional Rescuer, and Community First Aid and Safety. Student teaching is completed under the guidance of an experienced ARC instructor trainer. Students gain experience and develop insight and skill in the art of teaching American Red Cross courses.”*
- b. It is proposed that the course description for Advanced Emergency Care (0835.334) be changed from its current language to the following:
 - i. **“This is a sophomore level course designed primarily for athletic training majors and other allied health professionals. Students are trained in CPR for the professional rescuer as well as other advanced emergency skills. An additional observation experience in a local emergency room is required. There also is an optional lifeguarding component available in this class.”**
- c. Sponsors: Dr. Douglas Mann (Program Director, Athletic Training Specialization), Dr. Robert Sterner, Mr. Charles Whedon (Coordinator of Athletic Training Services) and the Department of Health and Exercise Science.

2. Rationale:

- a. The Commission for the Accreditation of Allied Health Education Programs, the accrediting body for the Athletic Training Education Program, recommended that we develop a more encompassing course description in order to make students more aware of the content in this course. Therefore the new course description has been altered to meet accreditation recommendations and standards.
- b. There has been no change to the content of this course, only the description.
- c. No change to the major or minor will result from this proposal’s approval. It also does not affect any other specialization in the Department of Health and Exercise Science.

3. Results of Consultation:

- a. None necessary.
