CURRICULUM PROPOSAL REVISION

NON-GENERAL EDUCATION

Athletic Training Specialization Minor Curriculum Change

Title: Revision to SCC# 02-03-306, SCC#02-03-307 and SCC# 02-03-308

Submitted by: Dr. Doug Mann, Dr. Robert Sterner and Mr. Chuck Whedon,
Department of Health and Exercise Science

Details:

After consultation with the Associate Provost, we would like to address the total credit hour question with this revised proposal. Currently, the Athletic Training Specialization has a total credit requirement of 131 semester hours. The original proposal increased the total number of credits to 133 to accommodate the proposals submitted for the Therapeutic Modalities for Athletic Injuries (Hegis #: 0835.475) and Therapeutic Exercise for Athletic Injuries (Hegis #: 0835.478). As a result and based on the recommendation of the Associate Provost, we propose that recognition be given to the fact that our students typically test out of the Computer Literacy course greatly reducing the demand on their time and course load. This recognition will allow us to add the Therapeutic Modalities Laboratory and the Therapeutic Exercise Laboratory without impacting our students' workload.

Rationale:

- a. We have previously submitted two proposals to increase credit requirements for Therapeutic Exercises for Athletic Injuries (3 to 4 credits) and Therapeutic Modalities for Athletic Injuries (3 to 4 credits). The rationale for the addition of the one credit was to add a weekly laboratory time for each respective class. The addition of laboratory periods will help us remain in compliance with the accrediting standards of the Commission for the Accreditation of Allied Health Education Programs (CAAHEP).
- b. Impact on Change of Curriculum:
Faculty are available to deliver these one-credit laboratories and student course load would remain unchanged.
- c. This proposal does not affect any other specialization in the Department of Health and Exercise Science or the College of Education.

Results of Consultation

- a. None Necessary

Memorandum

To: Kathy Ganske
From: Robert Sterner
Date: 2/4/2003
Re: Athletic Training Specialization Curriculum Proposals

Kathy,

Please be advised that the curriculum proposals *Changing Therapeutic Exercise for Athletic Injuries (Hegis #: 0835.478) from a 3-Credit Course to a 4-Credit Course*, *Changing Therapeutic Modalities for Athletic Injuries (Hegis #: 0835.475) from a 3-Credit Course to a 4-Credit Course* and *A Proposal to Increase the Athletic Training Specialization Total Credit Requirements from 129 to 131* although written separately are linked together within the curriculum changes for the Athletic Training Specialization. Please contact me at extension 3767 if you have any questions

Sincerely,

Rob Sterner

August 28, 2003

To Whom it May Concern:

This letter is in reference to curricular change 0-03-308, which requested a change in the athletic training curriculum from 129 to 131 credit hours. The existing athletic training curriculum requires students to enroll in computer literacy. Since this is a University mandate, the athletic training program is no longer making it a program requirement, as all students will need to meet the University requirement.

Current Curriculum: 131 credits with computer literacy included.

Proposed change: 128 credits, which removes computer literacy but includes the request of curricular changes 02-03-306 (Change Therapeutic Modalities (0835.475) from a 3 credit class to a 4 credit class) and 02-03-307 (Change Therapeutic Exercise (0835.478) from a 3 credit class to a 4 credit class.

If you have any questions, please contact me at extension 3706 or Dr. Sterner at extension 3767.

Sincerely,

Douglas Mann
