1. Details

A. Course Title: Instructional Technology

B. Sponsor: Department of Curriculum and Instruction:
Elementary/Early Childhood Education

Ad Hoc Committee: Dr. Howard Rosenberg
Dr. Marion Rilling

C. Course Level: Undergraduate; one credit hour

D. Curricular Effect: Professional requirement in the new program for majors

E. Prerequisites: None

F. Suggested Time: Begin in the Fall, 1984 semester as an elective for majors;
a required course in Fall, 1985 for juniors

G. Adequacy: Present resources sufficient for implementation

2. Rationale

The revised elementary education certification program includes a course focusing upon instructional technology. This course is designed to provide students with experiences in selecting, developing, and using instructional materials and equipment used in classrooms for teaching elementary school children. At the present time, each curriculum and methods course in our program attempts to highlight instructional materials and technology used in curriculum areas (e.g. language arts, social studies, etc.). This new course will support these learnings by highlighting the general principles and skills of using media and technology.

3. Essence of the course:

A. Students will operate devices such as a film projector, an overhead projector, a microcomputer, a spirit duplicator, and a thermofax.

- B. Students will select and use ready-made media such as films, filmstrips, and computer programs and evaluate their potential impact on learning (motivational, facilitator)
 - C. Prepare instructional materials appropriate for several grade levels.
 - D. Students will contrast and evaluate various instructional media and material and list criteria for usage.
 - E. The above objectives indicate the course's content. The emphasis will be on hands-on activity. The course text will be the AV Instructional Technology Manual edited by Brown and Lewis (6th Edition).
 - F. Students' grades will be based upon (1) the completion of projects, (2) demonstration of skills and (3) tests designed to determine students' competence in the course content areas.
 - G. The course will be evaluated annually by the appropriate department curriculum committee.
4. The following faculty members were consulted orally on this proposal: Dr. Thomas Gallia and Professor James Michaelson who expressed approval on the objectives and content of the course described in this proposal.
5. None

Catalog Description

INSTRUCTIONAL TECHNOLOGY

6. This course is designed to provide students with experiences in selecting, developing, and using instructional material and equipment typically used in elementary school classrooms. It is to be taken at the same time as the first curriculum and methods course.
