

Water Bottle Fill Station Locations (Glassboro Campus)

Adding to its existing stock of filtered water-bottle filling stations, Rowan has installed eight new stations bringing the total to 27 with three more to be installed by the end of the fall 2016 semester. These filling stations/water fountains have ANSI/NSF approved filters that capture lead that may exist in the water. They also feature an electronic monitoring system that clearly shows users whether the filter is operating (a green light), close to needing to be changed (a yellow light) or needs to be changed (a red light). When the light is red, the fountain will disable itself until a new filter is installed.

<u>Current</u>	<u>Location</u>
