Are you an elementary school teacher that would like to position yourself to teach middle school math someday? Are you a middle school math teacher who is not yet certified? This workshop will focus on a detailed review of relevant Algebra content that is emphasized on the Middle School Praxis Exam (5169). Participants in this workshop will explore open-ended Algebra content questions that are designed to reinforce Algebraic concepts that are typically tested in the form of multiple choice questions on the Praxis Exam. A comprehensive overview of the ETS Graphing Calculator by Infinity Softworks that is accessible during the Praxis Exam will also be included.
