

# STAR CLOCK

Cut out both sections  
 Fasten centers with brad

**THE TIME IS**

**STAR CLOCK**

- Go outside, find the Big Dipper and North Star.
- Face the North Star
- Turn the outer circle so current month is at the top
- Keeping that month at the top, turn the inner circle until the Big Dipper aligns with the real Dipper
- Read the time in the window. Add one hour if Daylight Saving Time is in effect.
