

## Transfer Policy for the College of Engineering

1. For applicants that have 24 or fewer credits, evaluation will be based on Rowan College of Engineering's freshman admission standards and completed college-level work.
2. As a basis of academic evaluation, the applicant should have taken, or be enrolled in, the following courses at his/her institution before submitting a transfer application: College Composition I, Calculus I & II, Advanced Chemistry I, Introductory Mechanics (Physics I), Computer Science and Programming. All courses must be completed with C or higher, and with a minimum grade point average of 3.0.
3. A minimum overall grade point average (GPA) of 3.0 is required.
4. Transfer students who last attended college more than five years ago will be evaluated differently from traditional transfer students. Motivation, life experiences and career advancement will be considered.
5. An interview with a faculty member may be required for acceptance into the college.
6. Acceptance is based on availability of space in the class.
7. Transfer applications should be received by March 1 for the following Fall Semester, and November 1 for the following Spring Semester. Any exception must be approved through the Dean's Office.
8. Only grades of "C" or better are acceptable for transfer. Pass/Fail grades in any major course work are not acceptable for transfer.
9. Transfer credits can be applied to fulfill Rowan's General Education requirement. All courses must be approved as equivalent to Rowan University courses.
10. Acceptable courses up to a maximum of one-half the required credits towards graduation can be transferred into the College.
11. Applications are evaluated on a case-by-case basis. Any exceptions to the above requirements must be approved by the Dean's Office.
