How to Submit a Modification Request with a Continuing Review Application

In eIRB, you are required to submit a Modification for any changes or amendments to the original eIRB study.

When submitting a Continuing Review, if there are any changes to the original application, a Modification request also needs to be submitted.

After you have finished creating the Continuing Review, click on ‘Create Linked Modification’ in the “My Activities” section to create and submit your changes.

**IMPORTANT NOTE**: You will need to submit the Modification and Continuing Review separately.
