### **GLOUCESTER COUNTY HEALTH DEPARTMENT**

**Location: Washington Township Clinic - 204 East Holly Ave. Sewell, NJ 08080**

**Telephone: 856-258-4183 (or 856-218-4101 - general health dept. number)**

**STD Clinic times: Every Wednesday from 3:00 to 4:30 pm.**

**No appointment necessary.**

- The Department of Health provides confidential **STD (Sexually Transmitted Disease)** testing and treatment at multiple locations throughout the county. This clinic staff will diagnose and treat common sexually transmitted infections. When attending this free clinic, be prepared to answer personal questions, so that we can more efficiently care for you. Most clients will be tested for HIV and syphilis. Our certified HIV counselors will discuss the risk factors from acquiring HIV or other STD's. They will help you develop a plan to prevent you from becoming infected. Other testing can be performed by an infectious disease doctor based on the patient's symptoms or complaints.

**HIV Only Clinic times: Every Thursday from 4:00 to 5:30 pm.**

**No appointment necessary.**

- HIV counseling and testing is also provided by our nursing and clinical staff for those who require HIV testing only. This program offers the same HIV counseling and testing as the STD clinic. This clinic does not diagnose or treat AIDS. We discuss risk factors and risk reduction strategies for people 18 years of age and older.
