REGISTRAR SIGNATURE/DATE

Minor change

1. Details:

Change requested: Expand list of optional courses for the Minor in Physics to include all advanced physics courses.

Sponsors: Eduardo Flores, Jeff Hettinger, Hong Ling, Department of Chemistry and Physics

2. Rationale:

The present Minor in Physics requires students to take Physics I, II, III, plus any two advanced physics courses from an old list. This list has not been updated in years. The Department of Chemistry & Physics now offers more physics courses such as Quantum Physics (1902.389) and Statistical Physics (1902.387). These courses should be part of the list of options for a Minor in Physics. Since we anticipate that more physics courses will be added in the future, we propose that the list of advanced physics courses includes all advanced physics courses taught in the Department. Advanced physics courses are defined as those courses with Hegis number of 300 or greater.

3. Consultation:

The faculty of the Department of Chemistry and Physics approved this change.
