Rowan University Information Resources

Windows XP Supported Applications AY08

Overview

Information Resources has implemented new standards that will allow employees and students to install supported software applications for Windows on demand from any supported Rowan owned computer on campus. This will allow any authenticated user to install all supported software on any computer lab, TEC room, or employee-use computer.

This document lists the software that is available for installation from the Network Application menu.

This is a living document and it will be changed during the academic year.

Microsoft

Application Name	Documentation	Network Application Availability	IR Support Level
MS Office 2003 Pro	View Site	Y	Full
