

# Returning to Campus

Testing requirements for the Spring 2021 semester

**Rowan students returning to campus in any capacity, either as a residential student, athlete, for in-person classes or for in-person activities, must have a negative COVID-19 test within 10 days of their return to campus.**

Students will not be permitted to live on campus or engage in in-person activities until a COVID-19 test demonstrating a negative result has been reported to the University via the [Medcat site](#).

---

## If you have tested positive for COVID-19 within the past 90 days (since Oct. 15, 2020)

- **No negative test required**

Following CDC and state guidelines, students that have tested positive for COVID-19 within the past 90 days (since Oct. 15, 2020) will not be required to be tested. Those students likely will continue to have positive results even if they have recovered and are asymptomatic.

- **Submit proof of positive results**

If you were not tested by the Wellness Center, you must submit proof of positive results through [Medcat](#).

Students should continue to monitor their Rowan email for additional information as the semester begins.

## If you tested positive for COVID-19 before Oct. 15, 2020

- **New negative test is required**

Students who had a positive test before Oct. 15, 2020 will need a new test demonstrating they are negative before coming to campus this spring.

- **Submit proof of negative results**

If you were not tested by the Wellness Center, you must submit proof of negative results through [Medcat](#).
