Instructions for Rating Interns on the Nine (9) Competencies:

The standard by which an intern is to be compared is that of a student social worker. The nine (9) competencies specified in this evaluation form are those established by Council on Social Work Education (CSWE). Under each competency statement are skills that have been identified by the school as desirable for a student in an MSW practice placement. **The student behaviors that were assigned through the Learning Contract are the behaviors that become the basis for assessing the student's skills at the end of the semester.**

Students are *not* expected to demonstrate all skills, and it is expected that there will be additional behaviors that are more appropriate to the agency and student learning that will be assigned to the student. The completion of this evaluation by the field instructor and the student can serve as a teaching-learning tool. It serves as a basis for assessing the student's professional growth, performance, and level of skill attained.

Rating Scale for Evaluation

1 Needs Improvement	The student has not demonstrated readiness in this area.
2 Developing	The student is approaching readiness but has not yet met basic expectations
3 Competent	The intern has met the expectations for interns in this area.
4 Above Average	The intern is functioning above expectations for interns in this area.
5 Exceptional	The intern is functioning above expectations for social workers in this area

Comments should be made under every competency statement. Please make sure to indicate those areas in which you think the intern is particularly strong and those areas in which the intern needs improvement. This evaluation is intended to give the intern feedback about their performance.
